

Course Information Linear Algebra (202001178), 2026-2027

Version: September 1, 2026

Schedule

Date	Time	Preparation exercises	Lecture	Tutorial exercises
Aug 31	10:45–12:30	1: 1–4	Ch 1	
Sep 1	13:45–15:30			1: 5–16
Sep 8	13:45–15:30	2: 1–5	Ch 2	
Sep 15	13:45–15:30			2: 6–18
Sep 22	13:45–15:30	3: 1–5	Ch 3	
Sep 29	13:45–15:30			3: 6–15, 16abc
Oct 6	10:45–12:30	4:1–3, 6:1–3	Ch 4 & 6.1–6.3	
Oct 6	13:45–15:30			4:4–6, 6:4–6, 9
Oct 13	13:45–15:30	5:1–6	Ch 5–5.2, practice test	
Oct 20	13:45–15:30			5:7–12, 15–18, 20abc

- *Lectures:*

All lectures will take place on campus: Lectures 1 in *TL 3330* and Lectures 2 to 5 in *WA 2*.

The lectures will *not* be recorded, so please make sure to attend them.

- *Lecture notes* are available in pdf format on the Canvas page of this course and if you prefer a physical copy you can have them printed at Xerox.
- *Tutorials* on campus in two parallel sessions. The tutorial rooms can be found on the course schedule under TimeEdit.
- The *exercises* refer to the lecture notes.
- Additional exercises can be found on *Grasple* (an online learning environment used for several mathematical subjects). Each week in Grasple you will find exercises and a diagnostic test which you can use to test yourself. These exercises supplement the exercises of the tutorials and are not obligatory.

I will update this document with information on how to access the Grasple exercises, once these have been prepared by the Grasple team of the university.

Click below link to enrol in Linear Algebra - Grasple Course for Premaster Program. https://app.grasple.com/#/course/15194?access_token=nBbQnoSZydw70T1PbzuByTSRvzDShci.

In the login screen you need to click on “Sign in with university account” to finalize your enrolment. After signing up, you may access your Grasple course again via <https://app.grasple.com>.

For more information and support about Grasple, see the *Grasple FAQ for students*: <https://www.utwente.nl/en/educational-systems/about-the-applications/icto/Grasple/student-help/>.

- Use the *Guided self study* (self study supervised; see your time table in TimeEdit) to study the material and understand the theory. This will help you solving the exercises.
- Further information, announcements or potential updates to the exercise selection will be communicated through updates to this document and/or posted to the Canvas page of the course.

Lecturer

Antonios Antoniadis (Contact by e-mail: a.antoniadis@utwente.nl)
